Bulletin Title	New Product: Designer Controller UTY-RVRY
Supersedes	N/A
Issued To	All
Originator	Martyn Ives
Date of Issue	20th February 2024
Pages	4 Pages

Dear All,

We are delighted to introduce our new Designer Controller.

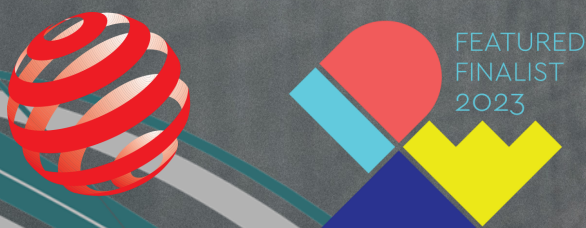

The UTY-RVRY Designer Controller harmonises with the décor of the room, the mirror design allows it to blend seamlessly in to any surrounding.

With its simple intuitive design it has the feel of a smart device, swiping the screen to change menus or functions. The multiple colour LED illuminates the frame of the controller, with the colour denoting the mode selected – [promo video](#)

The controller is extremely easy to setup, various functions and settings can be transferred to the controller via the app, using Bluetooth. These settings can be stored in the app allowing for multiple controllers to be easily configured.

Using the app, images can be stored and uploaded to the controller, perfect for businesses, hotels, and residential applications.

Reddot Design Award Winner and Featured Finalist.

AIR CONDITIONING

BLE*

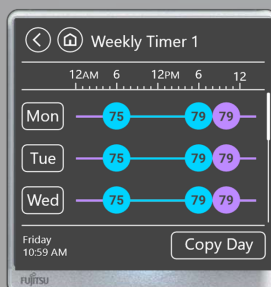

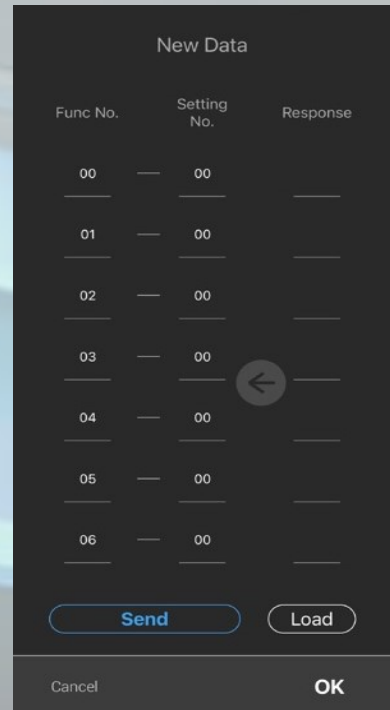

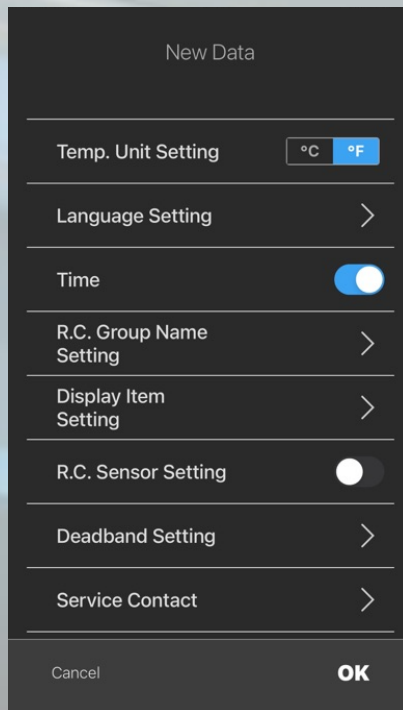

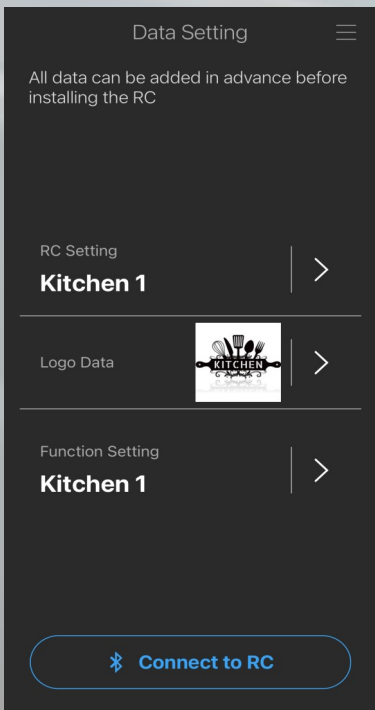

App: [Airstage Remo Set](#)

Via the Bluetooth app, multiple settings can be made:

- Time can be copied directly from the device to the controller
- Room name
- Contact details for service support
- Upload background image (multiple can be stored within the app)
- Password levels
- Set temperature band
- Function settings can be set and stored within the app (static pressure, temperature off-set etc)

All of the above can be stored within the app under a file name, meaning you can simply select the file to make multiple uploads.

The weekly timer design is within keeping of the Airstage app, making it simple to set.

Service & Maintenance:

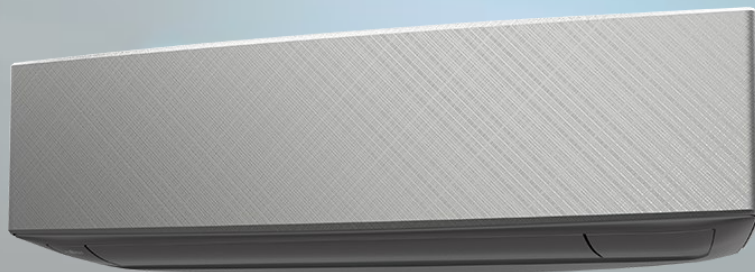

When connected to H Series split models (see bulletin 185 for details) and VRF systems, service information can be viewed on the controller for both the indoor and outdoor unit. This information includes:

- Temperatures
- Pressures
- Fan & Compressor rpm/s
- Drain pump & 4WV output

Compatibility:

The UTY-RVRY Designer Controller is a 2-wire non-polar controller, being compatible with all 2-wire indoor units, either, RAC, PAC or VRF.

Only H Series split models and VRF systems will give the option to display service information.
