

Silver Ion Filter

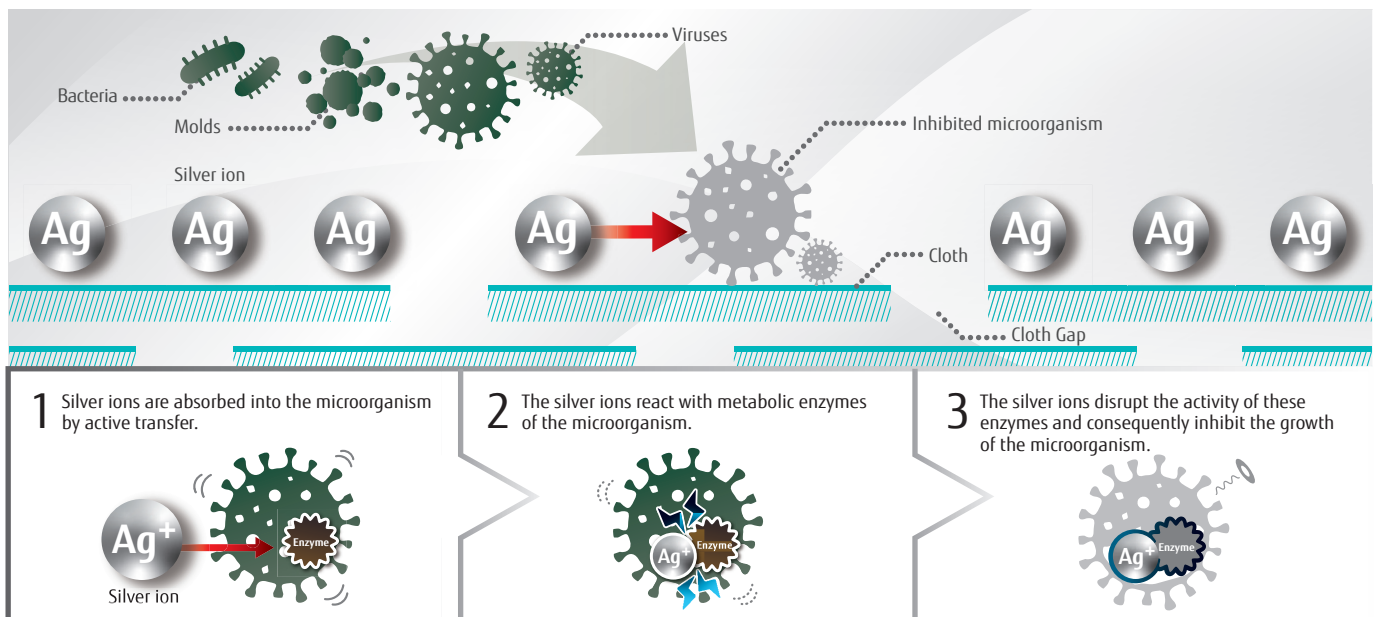

The Silver ion filter helps to reduce airborne viruses, bacteria and molds.*

Silver ion filter inhibits growth of microorganism actively.

* Based upon laboratory tests, performance in actual applications may vary

■ The silver ion filter inhibits the activities of viruses*1, bacteria*2 and molds*3 trapped on the filter.
(Only effective when the microorganism is trapped on the filter with dust or droplet)

*1 [Testing organization] Kitasato Research Center for Environmental Science [Test Report] No. 2020_0408 [Test virus] *Escherichia coli* phage Obeta NBRC 20012 (1 type) [Test Method] Based on the antiviral test method for textile products (JIS L 1922)
[Test results] Inhibited by at least 99% in 24 hours. Not tested to prevent transmission of SARS-CoV-2.

*2 [Testing organization] Kitasato Research Center for Environmental Science [Test Report] No. 2020_0409 [Test bacteria] *Escherichia coli* NBRC 3972 (1 type) [Test Method] Based on the determination of antibacterial activity and efficacy of textile products (JIS L 1902)
[Test results] The growth of the test bacteria was inhibited by 24 hours testing

*3 [Testing organization] Kitasato Research Center for Environmental Science [Test Report] No. 2020_0410 [Test fungi] *Aspergillus Niger* NBRC 105649 and other fungi (3 types) [Test Method] Based on the test for fungus resistance (JIS Z 2911)
[Test results] The growth of the fungus was inhibited by 28 days testing

■ The filter is easily removable* and hand-washable.
(wall mounted and floor models only)

*4 Hand-washing or vacuuming by 3 months is recommended. Cleaning frequency varies depending on the environment of use.

■ The Silver ion filter can be applied for various indoor units and installation sites.
